

# ‘The Light’: Promoting climate change denial and inaction

**If you care about climate change then reject The Light’s conspiracy theories**

You might think that The Light is only about opposition to vaccines and lockdowns, with a smattering of “natural therapies” and crank cures. But there is a bigger picture. The Light is part of a right-wing movement that aims to demobilise action against climate change.

It echoes the worst excesses of Trump-speak, claiming that climate change is a “hoax” promoted by a “global elite” that is using the idea of ecological crisis to usher in a world government and restrict the freedom of the individual. It praises and platforms so-called “climate sceptics” and pours scorn on climate activists.

# **'The Light': Promoting climate change denial and inaction**

The overwhelming majority of the world's climate scientists agree that "Human-induced climate change is causing dangerous and widespread disruption in nature and affecting the lives of billions of people around the world, despite efforts to reduce the risks. People and ecosystems least able to cope are being hardest hit."

But The Light has written about climate change in 16 of its 19 issues to date, almost always to say that it is a "hoax", a "racket" and a "fraud", and to denigrate even the weak and insufficient measures brought in by politicians as an unacceptable constraint on freedom.

**The Light is a vehicle for introducing vulnerable people to the ideas, personalities and organisations of the extreme right.**

**Take a stand against The Light.**
